

Polycom® Vortex® Installed Voice Products

The right solution for any size installation

The Polycom Vortex line of installed voice products allows you to experience Polycom's legendary voice clarity in any size room.

Large rooms present unique challenges to system designers. Microphones must often be mounted in the ceiling or incorporated into a table to provide the proper coverage and aesthetics. Poor audio quality and ambient background noise can degrade meetings and lectures. With industry leading acoustic echo cancellation, patented noise cancellation, and easy-to-use configuration software, the Vortex products perform well even in challenging acoustical environments and produce clear, crisp voice quality - even during simultaneous conversations.

The Vortex product line offers a range of solutions from single input to multi-microphone solutions with automatic microphone mixing, matrixing, and equalisation for the most sophisticated environment.

Multiple telephone callers can easily be added to a conference, and Vortex products are easily integrated with the revolutionary SoundStation VTX 1000™ wideband conference phone. "Quick Install" packs make setup of Vortex - SoundStation VTX 1000 systems fast and error-free.

You can also integrate Vortex products with the Polycom ViewStation® and iPower™ 9000 lines, and operate everything with your AMX® or Crestron® room control system.

Polycom – The Market Leader Worldwide
Polycom has been the worldwide conference phone market leader since 1992, and is focused on providing innovative technologies for all types of audio and videoconferencing applications.

The high-quality audio choice for The Polycom Office™

With integrated video, voice, data and Web capabilities, The Polycom Office is the only solution that offers you an easy way to connect, conference, and collaborate any way you want. The Polycom Office is our commitment to making distance communications as natural and interactive as being there. Work faster, smarter, and better with Polycom Vortex products and The Polycom Office.

For unsurpassed voice clarity and increased productivity in your conference rooms and offices, there's only one clear choice: Polycom. To learn more about Polycom conference solutions and The Polycom Office, go to www.polycom.com.

Connect. Any Way You Want.

Installed Voice Products Comparison

All Vortex products measure 483 mm x 244 mm x 45 mm (19" x 9.6" x 1.75") and are designed to be installed in a standard equipment rack. Connections to microphones, videoconferencing equipment and other devices are made on the rear panel.

Vortex EF2201

A DSP-based "phone add" for audio and video conferencing

Vortex EF2210

Echo and noise canceller for upgrading existing systems for audio conferencing

Vortex EF2211

Echo and noise canceller with "phone add" and power amp - great for small stand-alone applications

Vortex EF2241

Four-channel mic/matrix mixer with phone add and power amp - great for stand-alone applications

Vortex EF2280

Multi-channel mic/matrix mixer - ideal for large room applications

Conference Composer™ and InstantDesigner Software

These powerful software tools, provided with each Vortex unit, allow you to easily configure your Vortex product(s) for any type of application. Customisable settings include 5-band parametric EQ on all inputs and outputs; AGC controls; matrix mixing (with adjustable cross point gain levels), macro commands for cascading events, and more. Design your system in five easy steps with *InstantDesigner*, a room configuration wizard that automatically configures your Vortex product(s) based on the number and type of equipment required in the installation.
