

Polycom® Vortex® Installed Voice Systems

Even more reasons to switch now!

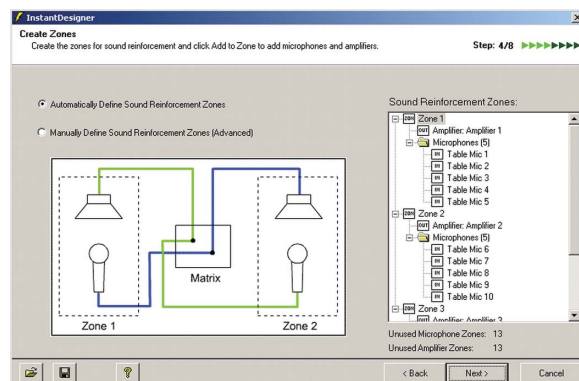

There's no reason to use anyone but Polycom for your conferencing installations. These new tools increase your productivity and help to provide added value to your customers:

Vortex Conference Composer™ InstantDesigner™

Version 2.0, now with sound reinforcement zone definitions, reduces system configuration time from hours to minutes!

- Automatically solves complicated audio designs with up to 64 microphones and 16 loudspeaker zones
- Establishes matrix crosspoints, AEC references, gain structures, zone definitions and more
- Automatically saves your choices as a Vortex preset
- New automatic reports provide accurate and detailed system documentation

Vortex - SoundStation VTX 1000™ Integration and Quick Install Packs

Amazing phone-add quality with a familiar user interface; quick install packs make system installations fast and easy

- Expands the coverage area of a SoundStation VTX 1000 into large facilities such as distance learning classrooms or courtrooms
- Quick Install Packs include everything you need for installation of a high quality voice conferencing system - microphones, loudspeakers, Vortex EF2241, SoundStation VTX 1000 and cabling; system is pre-configured for fast setup including audio connections to codec

Vortex Integration with new VSX™ 8000

Fast, easy way to bring amazing voice quality to all sizes of rooms

- Use the VSX IR remote to mute and unmute audio on the Vortex system - more room control through a familiar interface
- Compact, rack mount designs on both products give you an integrated, custom designed voice and video conferencing system in a minimum of rack space
